DETAILED ACTION

1. This action is responsive to Applicant's amendment filed on December 15, 2006.
2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed 12/15/2006 has been entered.
3. Claims 1-18 remain pending.

Response to Argument

4. Applicant's arguments have been fully considered and are persuasive. The 35 USC § 102 and 35 USC § 103 rejections have been withdrawn. However, the invention is not in an allowable condition for the following formal matters listed as below.

Specification

5. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed; such as "A Register-Based Program Code Conversion".

Claim Rejections - 35 USC § 101

6. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

7. Claims 1 and 17 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter; 'forming a network' does not appear to be a tangible result so as to constitute a practical application of the idea. The act of "forming" is merely a thought or an abstract idea and does not appear to produce a tangible result. Using the word, for example, 'generating' a network would fix the problem.

8. Claims 2-15 depend on claim 1, they do not cure the deficiency of claim 1 and are rejected under 35 USC § 101 for the same reason.

9. Claims 18 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter, 'organised into a branched tree-like network' does not appear to be a tangible result so as to constitute a practical application of the idea. The act of "organised" is merely a thought or an abstract idea and does not appear to produce a tangible result.

Conclusion

The following summarizes the status of the claims:

35 USC § 101 rejection: Claims 1-18
